Subject: Re: Correction to supplementary material
Attachments: SuppData1-bat_coronavirus_review-corrected.xlsx

Hi Ursula,

I hope you had a great end of the year, and wish you a happy 2022!

I apologize for the delay in communicating our decision.

We would like to update the supplementary data file in the paper with the correction of the table names. We propose the line below as a potential correction note.

“Cited references for data sourced from the PREDICT project were mislabeled as ‘PREEMPT’ in the Supplementary Data file originally published online.”

Thank you for your help,
Manuel

Hi Raina,

Unfortunately, we have one-size-fits-all correction system. It would look like the correction in this article:

<https://www.nature.com/articles/s41579-021-00604-w>

Correction notice right under the affiliations.

Let me know what you decide!

Best,

Ursula

[External - Use Caution]

Hi Ursula,

It is a very small error. How would the correction appear online – would it be a small note next to the supp info file, or a more obvious note next to the entire manuscript? We are trying to weigh up the options.

Raina

Hi Manuel,

We can update this for you, however, this would require a formal correction and correction note to be posted with your article. Please let me know whether you think the error is serious enough to correct. If so, we'd need the updated excel file.

Best,

Ursula

Subject: Correction to supplementary material

[External - Use Caution]

Dear Dr. Hofer,

I write to you on behalf of Clifton McKee and Raina Plowright in regards to an error we have recently detected in the supplementary material of the [recently published review on bat coronaviruses](#).

Specifically, we have detected that one tab of the excel file "41579_2021_652_MOESM1_ESM" with supplementary information is incorrectly named "PREEMPT 1&2 data". This tab should be named as "PREDICT 1&2 data" to correspond with the data as generated as a part of the PREDICT program funded by USAID. PREEMPT is another program funded by another agency which is not related to this data.

We would appreciate your guidance about how we could solve this issue, to provide the correct attribution of the authorship of those data.

Our apologies for the inconveniences.

Thank you in advance,

Manuel Ruiz Aravena
